

## **SABBIE**

## rough paint with an irregular sandy effect

bactericides. specific weight pH thinner water  Caratteristiche water absorption environmental classification Sabbie contains granular aggregates which give the paint a rough appearance  or requirement for specific labelling  Storage 1 year in the original packaging if stored between +5°C and +40°C  Supports Sabbie can be applied indoors or outdoors on flat, clean, healthy and dry surfaces. The prefabricated structures must not bear traces of release agents, the old or crumbling surfaces must be cleaned and consolidated. Plaster and wood must be treated with a suitable fixative. Do not apply on surfaces subject to rising damp  Laying Rules Laying and drying must be carried out between +5°C and +35°C, protected from bad weather of excessive sun. Do not apply materials from different batches on the same wall  Laying Apply a coat of fine-grained Fixaquarz as a primer. After drying, mix Sabbie well, without dilutin it, and distribute it with short strokes made with a flat brush. The grains present in the paint tend to fall to the bottom during application. Shake the paint from time to time. Wash tools with water after use.		0. 1
